EPSON Stylus PRO 10000CF
EPSON Stylus PRO 10600

EPSON Stylus PRO 4000

Product Profile

Premium Semimatte Photo Paper (250) is a heavyweight RC base media, with a low gloss semimatte surface designed for photographic applications.

This media is recommended for edge-to-edge printing with the EPSON Stylus PRO 7600/EPSON Stylus PRO 9600.

Features/Benefits:

- Highest colour gamut available for vivid colour reproduction
- Heavyweight RC base similar to Silver Halide
- Low gloss semimatte surface, lower than Premium Semigloss Photo Paper.
- Instant dry
- Enhanced 2880 dpi printing for the highest quality output
- Edge-to-edge printing
- It creates highly saturated prints by offering maximum ink coverage and a high D-Max for true photographic reproductions

Feature Checklist:

Feature	Performance	Additional Comments	
Indoor/outdoor usage	Indoor use only		
Lightfastness	Over 100 years Over 40 years	EPSON ColorFast Ink EPSON UltraChrome™ Ink	Lightfastness ratings are based on accelerated testing of prints on speciality media, displayed indoors, under glass. Lightfastness only estimates the life of the ink, not the media.
Gas-fastness	Excellent with EPSON ColorFast and EPSON UltraChrome™ Ink		
Dark storage	Good		Prints stored in a photo album in a protective sleeve will remain stable.
Resistance to water	Good		Bleeding does not occur with accidental water contact. However, this paper is not recommended for use in wet conditions.
Ink drying time	Immediate (less than 30 seconds)		Ink dry to touch after printing. However, it takes 24 hours before it cures and becomes durable.

* See *lightfast test conditions*

Note: Depending on the application, when using Dye Ink, the print may be affected by / sensitive to Ozone. This can be improved by lamination or glass mount.
